

**Coming Soon**

# BS3 Community Care

**Connecting individual care providers to local people who need care and support at home and in the community.**

## Call out

- Do you work in care and want more flexibility?
- Do you want to negotiate your own rates?
- Are you already working as a self-employed care provider or personal assistant?

Whilst we get ready to officially launch soon, we would love **YOU** to be the first to become a BS3 Community Care Approved Provider and benefit from this new and innovative way of providing local care for local people!

# Local Care for Local People

We are a charity pioneering a new way of providing care in the community, by launching a local introductory agency. This offers an alternative to traditional care agencies, which not only brings choice and control back to the person seeking care, but also embodies our ethos of local care for local people. All income will go back into the business, to ensure we are always growing and developing our services.

**Be your own boss and enjoy the freedom of being self-employed. Set your own schedule, decide how you want to shape your work and career and negotiate your own rates. We will carry out a vetting process, including enhanced DBS and identity checks, references, safeguarding training and verification of other relevant training and qualifications.**

Being part of the BS3 Community Care Introductory Agency will connect you to a range of opportunities to suit your skills, experience and interests. If you're new to self-employment we will provide you with support, training, and resources to make sure you feel confident and equipped in managing your own work.
