

Connect with Ease

LESSON 1

Online terms

Broadband

Broadband is a generic term for the internet connection which allows you to access the internet. To get home broadband, you'll need to set up a contract with a broadband provider (such as BT, TalkTalk or Virgin Media). The provider will charge you for the equipment needed to connect your smartphone, tablet or computer to the internet.

Browser

The computer software or app you use to access the internet – including Internet Explorer, Google Chrome and Safari.

Data allowance

If you aren't connected to Wi-Fi, using the internet on your smartphone or tablet uses mobile data, which is measured in megabytes (MB) and gigabytes (GB). Most phone and tablet contracts have monthly allowances for data usage. Once you use up your allowance, you might get charged for additional usage, or you might not be able to use mobile data until your allowance renews the next month.

Download

To transfer files or data stored on the internet onto your smartphone, tablet or computer. For example, you might download a picture that a friend has sent you over email, download a document to read from a trusted website or download an app from the online app store.

Email

Electronic mail, or email, is a free and easy way to stay in touch with family and friends, and the main way that organisations and companies will communicate with you. Popular email providers include Google Mail (commonly known as Gmail), Outlook and Yahoo.

Note any other terminology you think would be useful
